

## Fractions

### How do I multiply or divide fractions with my calculator?

Multiplying and dividing fractions most scientific calculators is easy because you can simply enter (type-in) what you see. The answer will always be in reduced form too!

#### Example

$$\frac{3}{4} \times \frac{5}{16} = ?$$

Type 3, press the  $\boxed{a\ b/c}$  key, then type 4.

Press the  $\boxed{\times}$  key.

Type 5, press the  $\boxed{a\ b/c}$  key, then type 16.

Press the  $\boxed{=}$  key.

Your display should look like this:  $\boxed{15\ \_ \ 64}$

This is your calculator's way of representing  $\frac{15}{64}$ .

#### Example

$$\frac{11}{16} \div \frac{1}{3} = ?$$

Type 11, press the  $\boxed{a\ b/c}$  key, then type 16.

Press the  $\boxed{\div}$  key.

Type 1, press the  $\boxed{a\ b/c}$  key, then type 3.

Press the  $\boxed{=}$  key.

Your display should look something like this:  $\boxed{2\ \_ \ 1\ \_ \ 16}$

which means  $2\frac{1}{16}$ .
