YOUR COMMUNITY TRAINING FACILITY

Public Safety Complex

Completed in 2012 after 5 years of planning and construction, the Southwest Tech Public Safety Complex has become the area's best resource for public safety professionals as well as the general public interested in wellness, safety, defensive, and professional career preparation training. Hundreds of hours were spent working with experts and end users to develop a training center that would fit the needs of first responders as well as citizens interested learning special skills at a safe environment with certified instructors.

The Public Safety Complex is home to the College's Criminal Justice-Law Enforcement, Fire, EMS, and Electrical Power Distribution programs. Expanding

beyond program students, the College offers police, fire, and EMS continuing education as well as multitude of classes in those topic areas geared towards the general public. The shooting range is used by many local groups and provides a safe and secure area to accommodate classes in hunter safety and concealed carry. Now that the facility is open and available, we are here to remind everyone of Southwest Wisconsin that this is your facility and classes are available to you and your business or organization. A wide variety of opportunities await you at the Public Safety Complex. Our staff will be happy to help you identify and customize the ideal experience for you and/or your business or organization.

The Public Safety Complex is here thanks to the many volunteers and the citizens of the Southwest Tech district. The facility is available to the public, businesses, and organizations to provide training and opportunities not available closer to you. Please feel free to contact our staff with questions on how we can custom tailor a course or lesson to your needs or wishes. If you have specific ideas for events, our knowledgeable staff can work with you to build your package. Remember, this is the PUBLIC'S safety complex.

Business/Organization Opportunities

Are you a business or organization leader looking for a unique opportunity to offer specialized training or team building activities? Is your business or organization required to comply with safety training regulations? Do you want to do something new, fun,

and exciting for a company picnic or bonus party? The Public Safety Complex at Southwest Tech will custom tailor an event to meet your goal of team building, compliance training, or just to try something new. Contact our staff to discuss the various options and find out how affordable an out of the ordinary event can be.
