Strategy and Tactics for Initial Company Operations is designed to develop the management skills needed by Company Officers (CO's) to accomplish assigned tactics at structure fires. The course material was developed for newly appointed officers or firefighters who may have acting CO responsibilities, but it would provide an excellent review for experienced officers. All activities and scenarios used in this course are based on structure fires.

**This is a National Fire Academy Course and the cost of the course is covered by a grant from the Fire Academy.**
