IMMUNIZATION FACT SHEET

DOCUMENTED PROOF IS REQUIRED OF THE FOLLOWING IMMUNIZATIONS.

We strongly recommend you start today in your search!

WHERE CAN I FIND DOCUMENTED PROOF OF MY IMMUNIZATION RECORD?

- Physician's Office/Clinic
- High School
- Public Health Agencies
- Online Immunization Registry

For a listing of Wisconsin Public Health agencies, please go to http://www.dhs.wisconsin.gov/localhealth/

MMR

- Documentation of 2 vaccines or copy of a blood test/titer indicating you are immune to the disease.

CHICKEN POX - VARICELLA VIRUS

- Documented proof of the 2 vaccine dates or a copy of the blood test indicating you are immune to the disease.

HEPATITIS B IMMUNIZATION

- Documented proof of the 3 vaccine dates or copy of a blood test/titer indicating you are immune to the disease.

COVID 19:

- Printed record for documented proof of 2 initial vaccine dates as well as boosters per your assigned clinical facilities requirements .

INFLUENZA:

- Printed record for documented proof of 1 vaccine date during the flu season.

TETANUS/ TDAP

- 1 vaccine that needs to be updated within the last 10 years.

TB SKIN TESTING

- Provide documentation of the last 2 TB skin test (tst) no more than 12 months apart or QuantiFERON Gold test or a T-spot.
- If you have never had a TB skin test before, or have let more than 1 year lapse since your last one, you will need to have a "2 step" TB skin test or a QuantiFERON Goldtest or a T-Spot test. The second test must be done at least 7 days from when 1st one is READ but within 3 weeks and subsequent annual TB screening is required.
  (See TB skin test form for more information.)

COMMON CONCERNS/QUESTIONS

I think I got all my injections or I think I had the disease, but can't remember. I can't locate my immunization dates to hand in.
It's simple, you will need to get a blood test/titer from your physician to indicate you have had the disease or you have built up immunity to the disease.

What does a blood test/titer mean?

- Simple blood test which indicates that enough antibodies have been produced to protect one from future infections.
- **IgG titer** indicates long-term immunity

Allergies - Don't forget this section! We need to know in case of an exposure!
